Erosion Control Additives

SCE-TAK

Description: SCE-TAK is Poly Acrylamide.

SCE-TAK is pure white granular. It bonds fiber mulch to soil particles to prevent erosion. SCE-TAK is hydrophilic and allows water is allowed into the mulch matrix. This provides an excellent environment for seed germination and establishment.

SCE-TAK lubricates the slurry and eliminates clogging.

SCE-TAK is suitable for tacking straw mulch, with a hydromulch carrier!

Application Rates:	<u>Area</u>	<u>SCE-TAK</u>
	5,000 sq.ft.	9 oz.
	10,000 sq.ft.	18 oz.
	1 Acre	3 lbs.

Dust Control Rate: 1 Acre * 3 lbs.
* Apply in 1,000 gal. water/acre

Mixing Instructions: When the hydraulic hydroseeder is one third full of water, slowly add SCE-TAK and agitate into a uniform slurry.

Loading Sequence: Refer to the equipment manufacturers loading sequence instructions.

Site Preparation: Grade preparation should divert water flow away from the face of the slope.

Characteristics: Anionic Linear Copolymer of Acrylamide
Viscosity: 2,410 cps

Fish Toxicity: LC/50 Pimephales Promelas/96 hours > 100 mg/l.

Storage: Maintain packaging integrity. Protect from moisture, and high temperatures.

Handling: Slippery when wet. Clean up spills immediately.

Caution: Wash with soap and water after contact. Eye contact will cause irritation. Keep out of the reach of children. Keep away from open wounds.
